

# Respect Elect™

## Make your vote count.

**Voting shouldn't be hard.**

**Democracy depends on engaged citizens. Yet, at best, only half of our votes count.** If we vote at the wrong polling place, make mistakes on the ballot, or, worse yet, don't show up at all, our vote doesn't count. Even though voting is our right, sometimes it's a hassle because every cycle brings:

- Ballots that are built with confusing language and complex layouts
- Too many choices, most of which we know little about
- Ever-changing voter qualification details.

Imagine that complexity gone. What if you had an easy-to-use app that gave you:

- Accurate details on when and where to vote.
- Instructions to ensure you're not turned away at the polls.
- Recommendations on each and every item on the ballot.
- The ability to enter the polling place with all of your choices already made.

*Imagine no more, that's Respect Elect.*

### Use the wisdom of your crowd.

Most of us don't have the time or energy to research everything on the ballot. At best, we'll make educated guesses on items we aren't sure about. At worst, we'll rely on sound bites and negative ads from groups we've never heard of to sway us at the polls.

There's a better way. World leaders depend on expert trusted advisors to help them make major policy decisions. Imagine if you had access to your own expert network to make decisions about candidates and issues. How much easier would voting be - and how much more would your vote count - if you had the recommendations of those you trust and respect right at your fingertips as you vote.

*Imagine no more, that's Respect Elect.*

With Respect Elect, you decide who you trust and respect to help you make important voting decisions. Anyone using Respect Elect can share recommendations regardless of

political views. The secret is that you decide whose opinion matters most, whether that opinion covers presidential politics or the local school board.
